

**Agrolot.com** is an international trade and information platform on the B2B market for trading in products of agriculture and food stuffs. The innovation of these projects includes the following:

1. A simple conclusion of transactions by the use of smart-contracts and an ultimate execution;
2. Efficient and economic benefits to all trading participants within the trading transactions;
3. Secured and transparent transactions on the basis of blockchain and all its members.

The making this project was as a result of our experience in the market of international trade in products of agriculture and food stuffs. We have made all our businesses processes rational such as finance, logistics, storage, insurance.

After testing all similar platforms, we have concluded that the majority of them offer services of the local nature and are not meant for real trading and getting real results, instead they are only informative.

We give a critical solution in the global trade. It will allow both small and medium sized manufactures and buyers to reach mutually beneficial deals from all over the world. In addition to that we guarantee payment security by the use of smart contracts; delivering all goods to their destinations safely.

For the success of our idea; the following is important:

- To introduce into the platform a payment system based on blockchain;
- To develop own OFIR coin (operative food international registration);
- To open AGROLOT representative offices, for legal and logistic support of platform users around the world;
- To conduct a large marketing campaign for the target audience.

In order to maintain the long-term obligations within the platform; we will personally become one of the producers of agricultural products by use of the formation vertically integrated agroholding(VIA).

It is through the optimal attraction of investments, we choose ICO. We issue AGLT tokens based on the ERC-20 standard, where each token will be a share of our company. A person holding tokens will have the following rights:

- share in the project;
- the right to its share of the profit from the platform operation.

We will issue **100 million** tokens. Most of them (**80 million**) will be divided among investors, and **20 million** will become the reserve and insurance funds of the company.

ICO is planned to be carried out in 4 rounds:

**First round:**

**Private sale**

1 AGLT = 1\$

**2 million** AGLT will be sold **+bonus 100%**

Period: **from June 15 to June 19, 2018**

**The Second round:**

**Pre-sale**

1 AGLT = 1\$;

**3 million** AGLT will be sold **+bonus 50%**

Period: **from June 20 to June 29, 2018**

**Pre-Sale 30% from development budget**

**The third round:**

**ICO Sale**

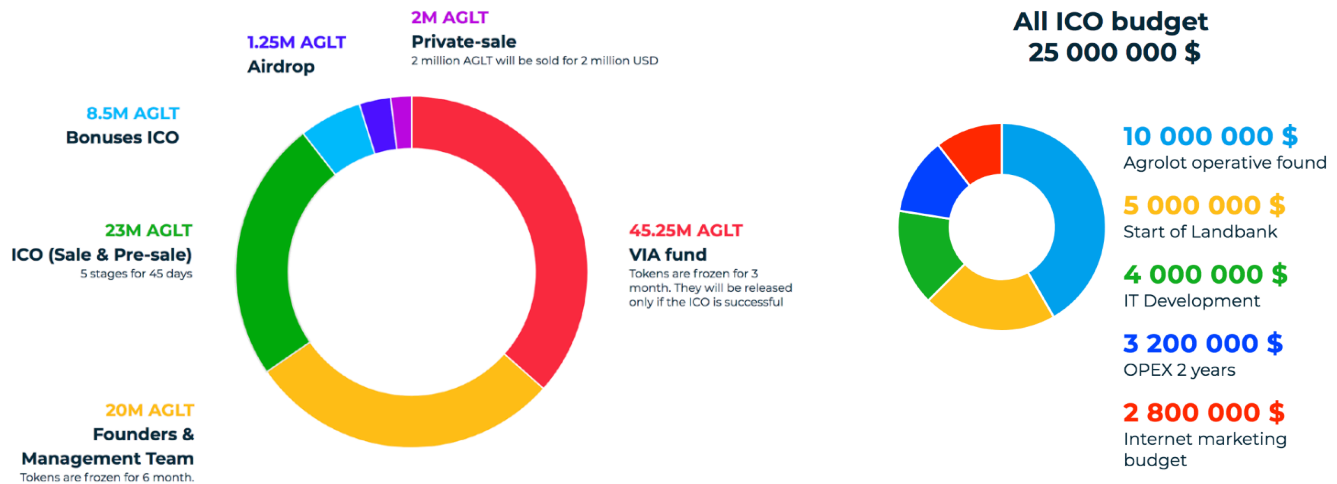

1 AGLT = 1\$

**20 million** AGLT will be sold Period: **from July 01 to September 28, 2018**

Bonuses accrual stages:

The collected funds will be distributed as follows:

**The fourth round** is the formation of a vertically integrated agroholding (VIA) step by step, through selling of tokens at the exchange as the location and repurchase of agricultural facilities. Facility repurchase process  
The process of facility repurchases:

- Finding a facility;
- Audit of the facility;
- Review and discussion with investors (token holders);
- Sale of the number of tokens required for the repurchase of the facility on the exchange;
- Repurchasing and commissioning of the facility.

#### Advantages of investment of the token holders

Every investor will receive important dividends depending on the number of token holders. The dividends are formed through:

- profit of the agrolot.com platform;
- increase the token cost;
- Profits originating from the vertically integrated agrarian holding.

After the financial audit for the period of reporting, the dividends will be distributed to the respective token holders into their accounts.

Our goal is to help small and medium businesses enterprises to penetrate into the international market and minimize the cost of foodstuffs to the buyer.
